PROJECTS

Financial Valuation & Modeling

- **M&A Financial Model - Torrent Pharma / JB Chemicals:** Modeled a *Rs.* 25,689 Cr buyout featuring synergy phasing, pro forma capitalization (*Rs.* 12,500 Cr NCD debt), and an EPS Accretion/Dilution bridge. Triangulated intrinsic value using DCF and Trading/Precedent Comps via a Football Field analysis.
- **Sum-of-the-Parts (SOTP) Valuation — JM Financial Ltd:** Valued Investment Bank, Mortgage Lending, Distressed Credit, and Platform segments using P/E-based multiples; derived intrinsic value of *Rs.* 208/share (75% upside) with bear–base–bull scenario analysis.
- **Leveraged Buyout (LBO) Model — Vedant Fashions (Manyavar):** Built from scratch including Sources & Uses, pro forma financials, debt schedule, and full returns analysis (IRR/MOIC).
- **3-Statement Integrated Financial Model — Nestlé India:** Built a fully integrated Income Statement, Balance Sheet, and Cash Flow Statement model with 5-year projections and key ratio analysis.
- **Discounted Cash Flow (DCF) Valuation — Cipla Ltd:** Forecasted FCFF to derive an intrinsic value of *Rs.* 1,157/share (~37% downside) via WACC and terminal growth sensitivity analysis.

Quantitative Finance

- **Black-Scholes Option Pricing Model:** Engineered an options pricing model utilizing Black-Scholes dynamics to calculate European call/put premiums; programmed Greeks (Delta, Gamma, Theta, Vega, Rho) to quantify underlying price sensitivities.
- **Fixed Income & Bond Valuation Model:** Built a dynamic pricing engine calculating YTM, Current Yield, and Clean/Dirty prices; formulated Macaulay/Modified Duration and Convexity to stress-test bond price volatility against interest rate fluctuations.
